# Terms & Conditions

## General Guidelines:

---

1. Selected location will be confirmed *1 day before the start of your photoshoot* for better weather accuracy.
2. A *good pair of shoes* may be required in most locations. Sandals are acceptable but extra caution will be needed as the areas are not paved.
3. All photos are sent as a sample from which you are to choose X amount of photos. Extra photos are available for purchase. These will be sent 1-5 business days after the photoshoot. Edited photos are sent *colour corrected* within 1-8 business days after selection is received. RAW files are not available. *Photoshop edits* are available upon request for an additional fee.
4. To receive samples *same day* as the photoshoot and edited photos *within 24 hrs* thereafter, there is an additional fee of €40.
5. During busy season (generally April-October), beach shoots must take place early in the morning. Afternoon sessions may only be possible in less touristic areas.
6. If you are more than 2 people, an additional €20 per person is required. Children aged less than 2 can be included free of charge.
7. A 50% deposit of total amount is required to reserve your spot.
8. Refunds are only given when cancelling 7 days in advance. In case of storms, a re-scheduling option will be given or a refund, in case no other date is found. Rescheduling may only be permitted in certain cases, and will be at the discretion of the photographer, unless informed well in advance (at least 5 days).
9. Please follow my instructions at all times to ensure your safety since we will be in areas of high grounds and may result in serious injury if proper caution is not taken. Participating in this photoshoot means that you are *voluntarily agreeing* to participate in the activities carried out, understand that there may be risks involved, assume all responsibility for such risks and hold me harmless from any and all claims.

# Terms & Conditions

## Drone Guidelines:

---

1. Drones can only be used in the *countryside*.
2. During busy periods, photoshoots *on the beach* which *include drone shots* must be done in the morning, starting with the drone first and then followed by shots taken with a normal camera. This is to avoid having too many people around, and is especially important between April - November, weekends, public holidays and other holiday periods. It is also *illegal* to fly drones on crowded areas.
3. Afternoon sessions with the drone during busy periods may only take place at the *cliffside of Popeye's V. or Lippija*.
4. If at any instance during the photoshoot the weather changes for the worse resulting in *unsuitable conditions to fly the drone*, then in such situations, the drone *cannot* be flown to ensure your safety and that of those around us. *Refund* for drone add-on will be given or additional edited photos to cover fee paid.

# Terms & Conditions

## *Underwater Photoshoot Guidelines:*

---

1. This type of photoshoot can be done for all level of swimmers. However, the more experienced you are, the varied the shots will be in terms of angles, backgrounds and poses.
2. Masks and fins are not provided. They are not necessary but feel free to bring your own.
3. The photoshoot location will be chosen according to your swimming abilities and weather conditions for the day (kindly keep in mind that weather & sea conditions change constantly so a change in location may be necessary under certain conditions).
4. Please make sure you are 100% truthful. Underestimating the sea is not a joke and doing so may result in dangerous situations. Kindly answer the following to be able to assess your swimming abilities:

- Can swim in saltwater without flotation devices or assistance
- Can stay in water without touching the ground for 10 mins+
- Can hold breath underwater for at least 15 seconds
- Can open eyes underwater
- Can swim up to 50m away from shore
- Can dive up to 10m deep

Don't stress if you can't do most of these! I have a variety of poses and angles that do not require any of the above skills.

5. Shots are taken with a dome and underwater housing on a GoPro. A dome allows for 50/50 shots ie. shots showing half above the water line and half below. Underwater housing is used for shots fully underwater.
6. This photoshoot does not include photos taken with a professional camera on land. If you would like to add this, a €75 additional fee is required which will give you +10 additional photos and 20 mins extra time of shooting.
